

PRODUCT DEVELOPMENT MANAGER

MAIN RESPONSIBILITIES:

CONSULTING WITH STAKEHOLDERS AND BUSINESS

- Lead regular discussions with stakeholders to define upcoming product requirements and critical success factors
- Keep abreast of market innovations as well as legislative changes in the UK and feed in to stakeholders/product development schedule
- Communicate latest updates and product news to the wider Pearn Kandola team

MANAGE PRODUCT DEVELOPMENT

- Produce and oversee product development schedule across the business
- Coordinate and manage end-to-end product development process and documentation for each new product and updates to existing products
- Scope projects, including timelines, milestones and budget constraints

MANAGE 3RD PARTY SOFTWARE DEVELOPMENT SUPPLIERS

- Manage requirements being placed on the technical team by stakeholders
- Manage offshore/onshore programming team to achieve agreed deliverables
- Hold regular performance review and action planning meetings with 3rd Party Suppliers
- Measure and report on progress; identify barriers and what is required to address the barriers

QUALITY ASSURANCE, TESTING & RISK MANAGEMENT

- To be aware of and manage various types of risk; involving other key parties if required to manage the risk; support people in the technical team to mitigate risk
- Lead and co-ordinate in-depth software testing and ensure Information Security Standards are met
- Oversee the quality assurance for work completed by the programming team
- Lead work to address issues in existing products or issues identified during testing

Programming experience not essential, but extremely desirable.

SALARY RANGE:

- £40,000 - £50,000

BENEFITS:

- 30 days holiday per annum
- 1 Community & 1 Enrichment day per annum
- Monthly Health & Wellbeing Allowance
- Contributory pension scheme - employer contributions of 10%, employee contributions of 5%
- Company wide bonus scheme

This role is full-time and based in our offices in Kidlington, Oxfordshire.
